Opus Projektor 2024.4.4

This OPUS Projektor Release contains the following software:

Projektor	2024.4.4
PClient	2024.4.4
OS A3	2.2.6
OS A6	2.2.6
OS EGSPRO	3.0.3
OS EGSCORE	1.5.0
OS OPUS-B2	1.0.0

Projektor 2024.4.4

bugfixes

- Project: Customer project file can't be loaded once it was opened.
- Events: No Navigation Events when creating a new page.
- Reporting: Unnecessary Jira notifications when updating irrelevant fields of a reported issue.
- JavaScript: Missing prefixes for DnD operations of JavaScripts into another JavaScript.
- JavaScript: DnD operations are now also supported for navigations scripts.

PClient 2024.4.4

features

- Add support for new variable "@LED_MultiColorStartupColor".
- Clear screen on Opus B2 if PClient terminates (won't work if it crashes).

bugfixes

- Make sure gauge gets updated if scale or offset change.
- Properly terminate PClient simulation on Windows.

- Fix z-order handling, so that alarm frames cannot end up behind a page.
- Avoid crash if border profiles with different width are used on a DDO.
- Completely repaint children of a container becoming visible. Before children's borders were not always drawn in this case.
- Fix that a JavaScript was not executed (without errors) if the last line of the file is a comment.
- Make Javascript show compile time errors (again). They were not shown since switching to the current JS engine.
- Project updater GUI is now shown even on Opus B2.

OS A3 2.2.6

Infos

- No change since last release.

OS A6 2.2.6

Infos

- No change since last release.

OS EGSPRO 3.0.3

Infos

- No change since last release.

OS EGSCORE 1.5.0

Infos

- See the corresponding os release notes.

OS OPUS-B2 1.0.0

Infos

- No change since last release.

Opus Projektor 2024.4.3

This OPUS Projektor Release contains the following software:

PCClient 2024.4.3

PCClient 2024.4.3

bugfixes

- Fixed VKB input functionality of String Fields / Numerics.
- Fixed JS function readEEPROM.

Opus Projektor 2024.4.2

This OPUS Projektor Release contains the following software:

Projektor 2024.4.2

Projektor 2024.4.2

bugfixes

- Fixed that the CAN port configuration settings aren't stored in the project.
(PRJEXT-10177)

Opus Projektor 2024.4.1

This OPUS Projektor Release contains the following software:

Projektor	2024.4.1
PClient	2024.4.1

Projektor 2024.4.1

features

- UT-Plugin is now available for B2.

-

bugfixes

- Version Control System: Fixed possible CheckoutConflictException, which could occur in some rare cases during save. (PRJEXT-9981)
- Palette: UT-Primary/Secondary View is now available for B2/B2+ UT-Projects.
- Fixed issue that on some Windows 10/11 machines the tools (Update, Simulation, ISO 1725 Camera Configuration) did not start properly.
- Reinstall Components: Avoid showing exception dialog if reinstall is not successful. (PRJEXT-10110)
- Now Project Format (.prj): Fixed updating Projektor file if a manual commit is triggered without save.

PClient 2024.4.1

features

-

bugfixes

- Arched bargraph only draws full circle for end of high resolution range, not for the start. I.e., filling less than one degree doesn't draw as a full circle anymore.

- Editing a list that is the first child doesn't crash anymore on confirm or ESC.
- Fixed size of disabled patterns for software rendered Opus B2.
- Don't follow stale pointers in cached navigation events. Could crash if the event referred to an object that got deleted meanwhile.
- Avoid crash when scripts are called from different threads, e.g. 'repeat' scripts from main thread and scripts triggered by CAN receive mappings.
-

Opus Projektor 2024.4.0

This OPUS Projektor Release contains the following software:

Projektor	2024.4.0
PClient	2024.4.0
OS OPUS-B2	1.0.0
OS EGSCORE	1.4.4

Projektor 2024.4.0

infos

- Updated built-in Java Runtime Version to latest LTS 21.0.2
- Updated PClient-Simulation, Variable-Simulation and Updater to 64bit.

features

- B2/B2 PLUS support.
- New project save format: If the project will be saved a .prj archive file be created. For more information please have a look at the manual.
- Softkey: Added new Softkey action 'Navigate Escape'.
- JavaScript-Editor: Added search/replace feature.
- Variables: Added new variables @PowerOnCycles, @PowerOffCycles and @CrashCount, @CPULoad, @FreeRAM, @TotalRAM.
- Undo/Redo: Improved undo/redo of opened JavaScript files. Content is now updated directly.
- Reporting: If a ticket was updated, the updated fields are marked with blue color in JiraIssueView component.
- JavaScript-Editor: Save button was removed. The script files will be saved automatically during project save now. Additionally the scripts will be saved if the editor loose focus.

bugfixes

- Undo/Redo: Fixed undo/redo for shallow paste operations.
- JavaScript-Handler: Fixed possible deadlock during save.
- JavaScript: Fixed handling of opened JavaScript files, which are deleted/renamed on the file system.(PRJEXT-5789, PRJEXT-5788, PRJEXT-5203, PRJEXT-3800, PRJEXT-2890)

PCClient 2024.4.0

features

- B2/B2 PLUS ProtoB support.
- JavaScript: Changed JS engine from QtScript to QJSEngine.
- PCClient simulation and other Windows tools are now 64 bit programs.
-
- Beta feature: Can provide ground speed for UT-Plugin's ISOBUS from a GNSS receiver.

bugfixes

- Fix softkey fadeout timing, esp. for softkey frames which are empty or hidden via visibility and allow setting fadeout time from script.
- Make sure one can touch objects below empty softkey frames.
- Make Javascript parameter format checks less restrictive and thus similar to the former JS engine.
- Make screenshot store on user defined location - if desired and don't overwrite existing files.
- Image cache now also considers image size, not only image content (file name). Prevents crash if image is used in different sizes.
- Navigation events get cached instead of dropped while navigation gets re-initialized (e.g. on page switch or visibility change). I.e. one doesn't lose 'release' event if doing something 'on press'.

- Fix some issues using line breaks in virtual keyboard used with UT-Plugin. Also make this VKB work on home page if loading screen is used.
- This VKB now also supports 'button cancel' and the button doesn't stay pressed if 'release' happens outside of the button.
- Gauge's 'valuesDistanceFactor' now has the desired effect. Before it internally used a hardcoded value of 0.12.
- Don't prolong beep period if clock is set backward while beeping.
-
-

OS OPUS-B2 1.0.0

infos

- See the corresponding os release notes.

OS EGSCORE 1.4.4

infos

- See the corresponding os release notes.

Operating System (OS) and PClient update

Please look at the included OPUS devices update file for detailed updating instructions for all devices.
