1 Overview

In this project it is shown how an Ethernet camera can be integrated in the OPUS Projektor.

2 Details of the project

The frame in the page is configured to show the stream of an Ethernet camera. The port is set to the default value of 5004.

2.1 Scripts

2.1.1 init.js

This script is running on the event OnProjektInit. It sets @Ethernet0_UpAtStart and Ethernet0_applynstart to 1, ensuring that the Ethernet port is activated.
