

Example Project Button events

Contents

1	Overview	1
2	Details of the project.....	3
2.1	Scripts	3

1 Overview

In this project it is shown how the different button events behave.

2 Details of the project

The project shows all events for buttons.

2.1 Scripts

All scripts only do one thing, they read the according variable, add one to it and write the variable back, to show when which event was executed, except `clear_string_fields`, which sets all variables back to 0.
